

Hospitals

Next Generation ERP Solutions for Hospitals

Allow technology to run the business when you focus on providing healthcare. Jooji's simple and robust hospital management system provides you a platform to manage clinical, back office, pharmacy, radiology labs, ambulances and EMR management aspects in a seamless way.

Billing

- Wards and bed billing
- Radiology lab billing
- Financial accounting
- TPA and Insurance providers
- HR and payroll
- Procurement and inventory
- Patient referrals
- Housekeeping

Easy to Use - Non accounting professional can use the system and create all the transactions while a senior accountant or manager can review, make changes if needed and approve the transactions.

Pharmacy

- Composition of Formulary
Search based on them
- Various insurance programs based
drug procurement and distribution
- Inventory store management with physical
drug verification, drug shelf life tracker,
manufacturer and supplier wise stocks
- Point of sales with integrated accounting
system for store front operations
- Both integrated healthcare system and
independent pharmacy system
- Suppliers and vendors management
system, track delivery challans and
tax invoices
- Track and issue of drugs formulary to
wards and inpatients
- Accounts payable and financial statements
- Patient drug history

Patient Management

- Inquiries Tracking
- Patients Registration & Appointments
- Casualty, Emergency & Physician Order
- Inpatients admission, transfers/discharge
- Ward, ICU, OT and bed booking
- Ambulances and blood bank services

Controlled Access - The access to various transactions is very fine grained and can be controlled at each small transaction level for each user

Real Time Reports - Current status like cash position, pending payments, receivables due can be accessed by anyone in the company who has access with the click of a button

Access From Anywhere - Access your data from anywhere - from home, from hotels when you are on tour; Work need not wait because you are not in office.

Multiple Locations can be managed easily since everyone can share the same data.

Electronic Medical Records

- Role based access control for records
in full and in part.
- Scan digitize and load all the paper
records into the system
- Structured data capture customized to
various pathology and radiology
departments
- DICOM/binary data capture with
meta tagging.
- Index and meta data based search with
security filtering.
- Analytic reports on clinical data repository.
