

# Research & Analytics

## *Big Data Solutions on the Cloud*

We are in a data-abundant age and our challenge is to leverage the data, clean and convert them into knowledge leading to various insights. Jooji's easy-to-use, insightful, simplified, yet robust research analysis solutions through our Jooji-proprietary Big Data Cloud Computing Platform provides an optimal solution.

Not all organizations need same set of business intelligence solutions, in fact even in the same organization depending on the growth the need changes from time to time. With the use of Jooji's solutions various data get collected at different levels, that can be put to smart reporting solution. Jooji's report module allows you to pivot, slice and dice your multi dimensional data across the modules to meet your goals — allowing you to draw the line between *Too little* and *Too much* information.

### Key Features

- Personalized report summary — enabling faster decision making with individualized KPIs
- Download raw data in spread sheet for sundry presentation purposes
- Smart wired report — takes you to the source of data, enabling audit
- Strategy planning by extrapolating the existing trends based on past performances, targets and budgets
- Data visualization with basic parameter filtering
- Work with imported external data from your other data sources and mesh visualization
- Cache managed report data for improved response times
- Security filtering.
